

Background of Outsource Management Group, LLC.

Outsource Management Group was formed in March of 2003 in a small home office in Bloomington, Indiana. As the business began to quickly outgrow this office, it was moved into a larger, yet still cozy 600 square foot facility in early 2004.

This move allowed the business to continue providing physicians with excellent results and grow its client base, as well as increasing the billing staff. As the client base and staff continued to grow, it became apparent in 2006 that the business had outgrown this facility and would need to move its operations to a larger facility accommodate its clients.

In the fall of 2006, Outsource Management Group moved its operations into a larger 1,800 square foot facility. This move allowed the business to continue to grow by providing unprecedented results to its clients. As the client base and staff has continued to grow, it became apparent again in 2011 that the business had outgrown this facility as well and would need to move its operations to a larger facility accommodate its clients.

In October of 2011, Outsource Management Group moved its operations to its current, 4,500 square foot facility near IU Health Bloomington Hospital and continues to provide unprecedented service to providers nationwide.

Fueled by the professional drive and determination of its co-founders Melissa Clark and Kathryn Disney, Outsource Management Group has grown over 2,000% since 2003 and has the proven ability and dedicated professional staff to handle all of your practice management needs, including medical billing, coding, credentialing, claims audits and more.

Outsource Management Group has the professional staff and expertise needed to provide outstanding service to physicians and other medical professionals from a broad range of specialties. Using the latest technology available we are able to provide our clients and their patients with fast, efficient service while maximizing our client's reimbursement level.
